Consumer interest in homeownership in Victoria unwavering over course of pandemic

A total of 989 properties sold in the Victoria Real Estate Board region this September, 60.6 per cent more than the 616 properties sold in September 2019 and 1 per cent more than the previous month of August 2020. Sales of condominiums were up 26.7 per cent from September 2019 with 280 units sold. Sales of single family homes were 91.9 per cent from September 2019 with 539 sold.

"Another month has passed where we have seen surprisingly high sales numbers – which included quite a few higher end properties," says Victoria Real Estate Board President Sandi-Jo Ayers. "I don't think that anyone who was trying to predict market outcomes in our area over the course of the pandemic expected that the pent up demand from dampened sales in April and May would result in this level of market activity. There's no doubt that buyers are extremely motivated and this increased demand, coupled with limited inventory, fueled the September market."

There were 2,389 active listings for sale on the Victoria Real Estate Board Multiple Listing Service® at the end of September 2020, 15.4 per cent fewer properties than the total available at the end of September 2019 and a 7.5 per cent decrease from the 2,584 active listings for sale at the end of August 2020.

"We had some much-needed new inventory enter the market over the course of September," adds Ayers. "But the supply has not been sufficient to outstrip the heightened demand. We continue to see multiple offers and pressure on pricing across many neighbourhoods. Looking forward, it is impossible to determine what our fall market will look like, but if the past couple of months are an indication, we may see higher seasonal numbers than we would have expected in a more predictable year. That said, since our situation can change in a blink, we cannot look at the past months as the start of a trend, but instead as a moment in our market during an unpredictable time."

The Multiple Listing Service® Home Price Index benchmark value for a single family home in the Victoria Core in September 2019 was \$849,100. The benchmark value for the same home in September 2020 increased by 3.5 per cent to \$879,200, 1.1 per cent less than August's value of \$889,200. The MLS® HPI benchmark value for a condominium in the Victoria Core in September 2019 was \$512,500, while the benchmark value for the same condominium in September 2020 decreased by 0.4 per cent to \$510,600, 0.6 per cent less than the August value of \$513.900.

About the Victoria Real Estate Board – Founded in 1921, the Victoria Real Estate Board is a key player in the development of standards and innovative programs to enhance the professionalism of REALTORS®. The Victoria Real Estate Board represents 1,376 local Realtors. If you are thinking about buying or selling a home, connect with your local Realtor for detailed information on the Victoria and area housing market.

Total new MLS® listings and total MLS® sales for entire district

This chart tracks the ratio of total residential sales over total active residential listings at month-end for each of the last 25 months.

The active listing count and the sales count can be viewed as indicators of housing supply and demand respectively. Observing the ratio between them can thus help indicate a "buyers' market", where there is downward pressure on prices, and a "sellers' market", where there is upward pressure on prices.

- below 10%, there is downward pressure on prices (buyers' market)
- above 25%, there is upward pressure on prices (sellers' market)
- in the 15-20% range, there is little pressure on prices either way (balanced market)

MLS® HPI benchmark and value - Single Family Homes

The Victoria Real Estate Board uses the MLS® Home Price Index (MLS® HPI) to report on market trends. The MLS® HPI uses the concept of a benchmark home, a notional home with common attributes of typical homes in a defined area.

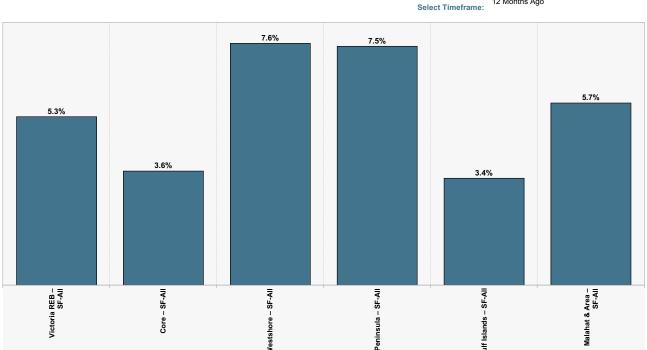

Through the analysis of over ten years of Victoria Real Estate Board MLS® sales data, the MLS® HPI defined benchmark homes for Victoria in each category (single family homes, townhouses, condos) and for each neighbourhood. The benchmark starting point was 2005, where each type of property and neighbourhood was assigned an index value of 100.

The Sales to Active Listings Ratio

This chart tracks the ratio of total residential sales over total active residential listings at month-end for each of the last 25 months.

The active listing count and the sales count can be viewed as indicators of housing supply and demand respectively. Observing the ratio between them can thus help indicate a "buyers' market", where there is sustained downward pressure on prices, and a "sellers' market", where there is sustained upward pressure on prices.

Based on a regression analysis performed by the Economics Department of the BC Real Estate Association in each market area of the province, the Sales to Active Listings Ratio for Victoria can be interpreted as follows:

- below 14%, there is downward pressure on prices (buyers' market)
- above 20%, there is upward pressure on prices (sellers' market)
- in the 14-20% range, there is little pressure on prices either way (balanced market)
